

# BURNING GRANBOARD BRACKET Installation Guide

## ■ Bracket set contents

Bracket 1x

Long tapping screw 4x

Short tapping screw 4x

## ■ How to install

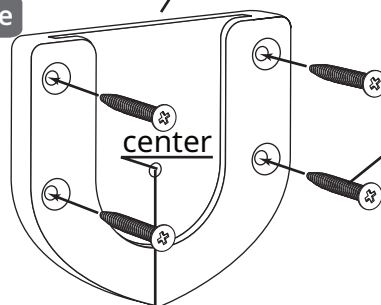

### When mounting to a wall

**Preparation:** Please prepare a Phillips head screwdriver for wall mounting.  
(Installation will be easier if you have an electric screwdriver.)

Walls with a hard core  
such as pillars

**Caution!** Do not install in the following locations:  
Where the wall does not have a pillar or other core  
Walls that are uneven and not flat

Wall side

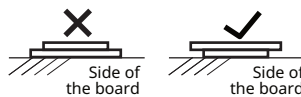

Long tapping screw

Attach to the wall with the bracket  
centered at a height of 173cm from  
the floor.

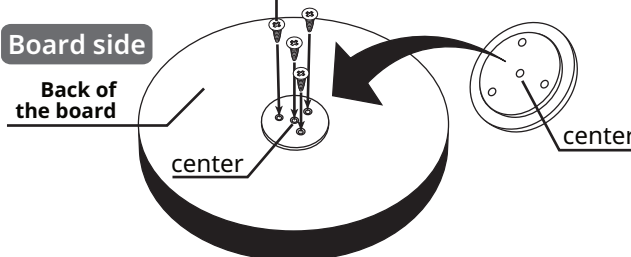

Short tapping screw

Make sure the small circle is  
centered on the back of the board.

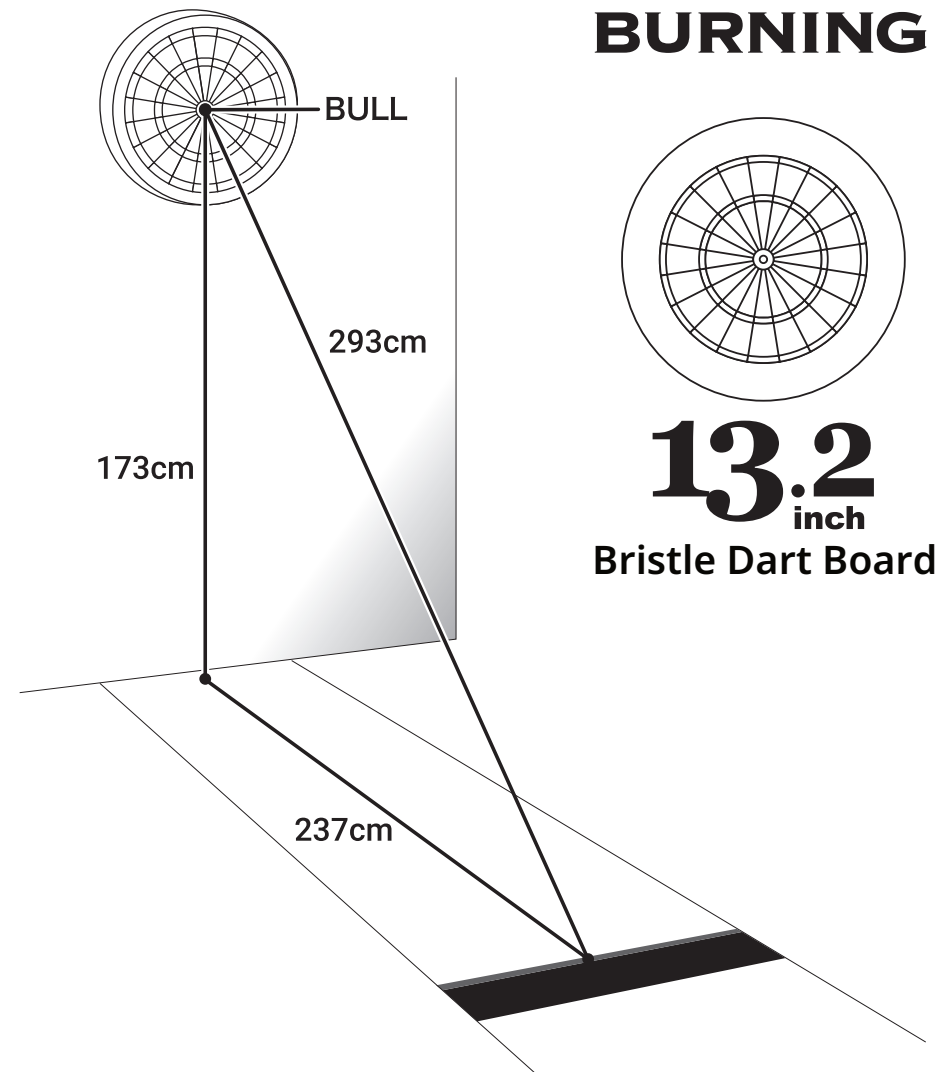

Board side

Back of  
the board

## ■ Distance and Height

The board is heavy, so please handle it with care. If installed incorrectly, there is a risk of it falling. Be sure to check the installation method carefully before installing. It is dangerous, so never throw darts at people. Keep darts out of reach of children. Never use for any purpose other than darts.
